

Application Instructions & Amounts

Potted Plants

- 1 Start with quality organic soil & fertilizer
- 2 Add **Harvest Gold Premium Soil Conditioner**
- 3 Stir until Soil Conditioner is mixed in
- 4 Transfer plant into pot
- 5 Add water

Pot / Container Size » Volume	Application Rates		Order # of 3lb Needed
	Application	Alternate Application	
6" » 1 qt.	7 tbsp.	-	1/6
8" » 1 gal.	1.5 cups	-	1/3
10" » 3 gal.	4.5 cups	1.25 qt.	1
12" » 5 gal.	7.5 cups	4.87 qt.	1 3/4
14" » 7 gal.	10.5 cups	2.63 qt.	2 1/2
16" » 10 gal.	3.75 qt.	.94 gal.	3 1/2
20" » 18 gal.	6.75 qt.	1.75 gal.	6 1/3
24" » 25 gal.	9.4 qt.	2.35 gal.	8 3/4

Raised Beds

- 1 Start with quality organic soil & fertilizer
- 2 Add **Harvest Gold Premium Soil Conditioner**
- 3 Stir until Soil Conditioner is mixed in
- 4 Fill raised bed with new mixture
- 5 Transfer plants into filled, raised bed
- 6 Add water

X	2 ft.	3 ft.	4 ft.	5 ft.	6 ft.	7 ft.	8 ft.	9 ft.	10 ft.
2 ft	6	9	12	15	18	21	24	27	30
3 ft	9	13.5	18	22.5	27	31.5	36	40.5	45
4 ft	12	18	24	30	36	42	48	54	60
5 ft	15	22.5	30	37.5	45	52.5	60	67.5	75
6 ft	18	27	36	45	54	63	72	81	90
7 ft	21	31.5	42	52.5	63	73.5	84	94.5	105
8 ft	24	36	48	60	72	84	96	105	120
9 ft	27	40.5	54	67.5	81	94.5	108	121.5	135
10 ft	30	45	60	75	90	105	120	135	150

IMPORTANT: The values above are based on raised beds with a height of 1 foot. Multiply the lbs (pounds) given in the chart by the height/ depth (in feet) given by the customer.

EXAMPLE: The weight given above for a raised bed that is 2 ft x 2 ft is 6 lbs, which applies to a raised garden with a height/ depth of 1 ft. However, if the customer has a raised bed with a height/ depth of 2 feet, multiply 6 lbs x 2 ft to adjust our recommended application to 12 lbs for a 2 ft x 2 ft raised garden.

Application Instructions & Amounts

1/16 acre	125 lbs.
1/8 acre	250 lbs.
1/4 acre	500 lbs.
1/2 acre	1,000 lbs.
1	1 ton

* If you don't own an aerating mechanism there are a few things that can be repurposed:

Screwdriver: 1/2" - 1" apart

Large Nail: Drive at least 2" down or multiple nails can be fashioned to bottom of shoes with a strap or board

Pitch Fork or spading fork: Stab down into the ground at least 2"

Rake: If soil is of a soft texture, poke the top soil with a downward motion

Aerate when your grass is actively growing - not during dormant season

1 Aerate the area of grass you plan to improve thoroughly *

2 Apply recommended portion of Harvest Gold to problem areas of lawn

3 Water thoroughly and, moving forward, continue normal watering regimen
